November 25, 2014

The Honorable Harry Reid  
Majority Leader  
United States Senate  
S-221 Capitol Building  
Washington, DC 20510

Dear Majority Leader Reid:

We write to respectfully request that you move promptly to confirm Franklin M. (Lynn) Orr, Jr. and Marc Kastner who were nominated on November 14, 2013 to serve as Under Secretary for Science and Energy and Director of the Office of Science at the Department of Energy. Dr. Orr and Dr. Kastner had their confirmation hearings for these two posts over one year ago, and are two of about a dozen nominees for positions at the Department of Energy who still await confirmation. It is now time that the Senate move to confirm these two individuals to positions that are vital to the direction and oversight of the important scientific and energy research supported by the U.S. Department of Energy.

Dr. Orr is one of our nation’s leaders in energy and science, with a distinguished record in innovation, research, education and administration. At Stanford University, he served as the Director of the Precourt Energy Institute and the Dean of Earth Sciences after chairing the Department of Petroleum Engineering. Dr. Kastner is a leading U.S. physicist and most recently served at the Dean of the School of Science at the Massachusetts Institute of Technology (MIT) after heading its Department of Physics.

If confirmed, both of these individuals will help to steward an important component of our federal research enterprise – the Department of Energy and its national laboratories. We believe that the scientific and energy research, unique world-class user facilities, and teams of skilled scientists and engineers funded by the Department of Energy at universities and national laboratories are critical to long-term economic growth and job creation. Economic experts have asserted as much, crediting past investments in science and technology for up to half the growth in the Gross Domestic Product (GDP) in the 50 years following the end of World War II. The confirmation of Dr. Orr and Dr. Kastner will provide leadership in our nation’s efforts to advance scientific discovery and to develop breakthrough technologies and other innovations that will enhance America’s energy security and economic competitiveness.

The Energy Sciences Coalition (ESC) is a broad based coalition of organizations representing scientists, engineers and mathematicians in universities, industry and national laboratories who are committed to supporting and advancing the scientific research programs of the U.S. Department of Energy (DOE), and in particular, the DOE Office of Science.
For these reasons, we urge the Senate to move forward on these nominations before the end of the 113th Congress.

Sincerely,
